

Farm Map Drawing

What is needed?

House portrait

1. A photo at the angle of the house you want to be drawn.
2. A wide-angle view of the house. This allows me to see the surrounding area and add any potential nature and foliage. If it's not possible to take the wide view photo as one, multiple images will work, and I can create one from them.

Farm Map

1. A screenshot from Google Maps of the land, along with any information you would like to include.
2. If possible, an aerial code would be helpful so I can zoom in on Google Maps to clarify any details.

Sample Farm Map

Simply mark the land boundaries and label the fields with names and numbers as illustrated below.

Field Names

1. The bog
2. Kenny's field
3. The paddock
4. The Orchard
5. Upper Field
6. Lower Field
